**Details:**

Philthy Ventilation sytems

**Details:**

**Statement of Grievance:**

Vents have been exposing us to really bad air quality. at this moment I have dust, black particles, and insects on top of my bunk that were blown out of the vent up above my bunk, this kind poor air quality within this dorm has been causing my nose to be congested, causing me breathing problems. this ventilation requires a deep cleaning. Pbnds 1.2 preventive maintenance and regular inspections shall be preformed to ensure timely emergency repairs or replacement and to prevent dangerous and life threatening situations. There has not been any preventive measures from this facility, filters need to be changed frequently, ventilation systems requires deep cleaning, there shouldnt be any reason why I'm having pest and vermin on my bunk,

**Relief Sought:**

Provide the deep cleaning within these ventilation system we have in place  
 Change air filters  
 Change air filters frequently as its urgently required at this moment

DATE/TIME	USER	ACTION	DETAILS
01/23/23 15:28	KBLAIR	Staff Response	After speaking with the Maintenance Supervisor concerning ductwork, we comply with established maintenance procedures. We ensure the HVAC units are working properly and change the air filters monthly. In addition, we have installed a system in our ductwork that kills germs as the air passes through the ducts. The air coming into your unit is safer than the average home or business. You may remove any built-up dust on any vents near your bed with a damp rag if you so choose.
01/23/23 15:28	KBLAIR	Changed Status	From 'Open' to 'Closed'
01/23/23 15:24	KBLAIR	Changed Disposition	Changed the disposition value for level 1 from to Unfounded
